

Invoicing & Accounting

GST-compliant invoices in seconds

Easily create, print and email professional invoices with TallyPrime. Configure details, add a logo, and personalize them to your needs. Generate GST invoices, export bills, e-Invoices, e-Way bills, and print MSME UDYAM numbers on invoices easily.

Flexible purchase and sales management

Do you follow different sales and purchase cycle? TallyPrime seamlessly adapts to different purchase and sales cycles, whether order-based or direct transactions. Manage sales orders, debit/credit notes, and payments effortlessly while keeping your books up to date with complete flexibility.

Multiple billing format

TallyPrime supports different billing formats to suit your business needs. Whether you deal with products or services, TallyPrime ensures faster, error-free billing with the right format for every transaction.

Multi-currency support

Record invoices, quotations, orders, accept payments and receive bills in foreign currencies. TallyPrime auto calculates forex gains/losses due to currency fluctuations, ensuring accurate financial adjustments.

Multiple price levels

Create different price levels for wholesalers, retailers, or customers and assign different price lists with quantity-based rates and discounts. Ensure faster, error-free billing by auto capturing price details with TallyPrime.

Payment QR code and link on invoices

Easily add QR codes and payment links for single invoices or in bulk for multiple invoices.

Multiple addresses for company and ledgers

Create multiple addresses for your company and party ledgers and use them in invoices and reports as required.

Experience TallyPrime firsthand, no installation required

Automated Voucher Creation

Import bank statements and create vouchers to complete your accounting process.

Invoice Personalisation

Easily personalise your invoices in TallyPrime, just the way your business needs.

Invoice Management System (IMS)

Track vendor sales in real time and ensure smooth Input Tax Credit claims and GST compliance.

Additional invoicing & accounting features in TallyPrime

- Multi-task seamlessly without hindering your workflow or losing your progress
- Bills receivables and payables are automatically managed while you save your invoice
- Pre-set the duty and other ledgers and create multiple billing templates to reduce the repetitive data entry in the invoice
- Easily record and account post-dated transactions and track those with post-dated register
- Record transactions such as buy one, get one, free samples etc., using 'Actual and Billed quantities' and 'Zero-valued transactions'

e-Invoicing

Instant e-invoice generation

With TallyPrime's fully connected e-invoice solution, you can automatically generate e-invoices and print IRN & QR code on the invoices without manual intervention.

Bulk e-invoicing

Need to generate bulk e-invoices? With TallyPrime, you can easily send bulk invoices to IRP for e-invoicing, automatically fetch and print QR codes on the invoices.

Generate e-way bill along with e-invoice

By design, the e-invoice system (IRP) integrates with GSTN and the e-way bill system. TallyPrime leverages this facility and generates e-way bills alongside e-invoices.

e-Invoice reports

TallyPrime provides dedicated e-invoice reports, offering a clear view of transaction statuses like generated, pending, or cancelled invoices. It also includes an e-invoice register, helping you stay on top of all your e-invoicing tasks.

Online e-invoice cancellation

In some situations, invoices with an already generated IRN may need to be cancelled. With TallyPrime, you can easily cancel such invoices and send the cancellation request to IRP directly from the software.

Instant Demo - e-Invoicing

Generate e-Invoices instantly with TallyPrime. No installation, no download. Try it instantly, yourself.

Experience TallyPrime firsthand, no installation required
